About Me

I am a creative and technical sound designer across multi-media. I work with games, TV & Film and as a linear/adaptive music composer. I have proficiencies within multiple different software and middleware including: Unreal Engine, WWISE, FMOD, Pro Tools, Reaper, Unity, Adobe Premiere Pro, Adobe Audition.

Audio is a passion of mine and I intend to create some truly awesome stuff! I am currently based in Manchester, UK. I have studied Game Audio and have amassed 3 years of experience working with games. Before games, film was my passion — which, coincidentally, has a lot of crossover. Overall, working within media I have 5 years of experience!

Experience

WWISE & Unreal Engine - Game Audio Implementation

Stack o'Bot & Lyra Game Template

- Multiple sound design projects — ready to play
- **Please inquire for more information!**

Threshold - Student Film

2025

An experimental student film exploring the nuances of the human condition and how one's morality can be skewed by thoughts and visions. Led the audio design team — recording, implementing and mastering the final cut.

CAVED-IN - Horror Game

Horror Game Jam #22

A horror multi-tasking game about fending off a snow zombie from entering your cave — everything runs on coal and you must mine to survive. Implemented, recorded and edited the full audio for this title.

On-Set Audio Recording - University Productions

Multiple University Project Productions

Mic-ing up actors and actresses, live mixing audio, helping set up sets and organising audio equipment. Involved in several university project productions throughout studies.

Education

Futureworks - Salford, Greater Manchester

BA (Hons) Game Audio | 2023 - 2026

Sound design, recording, game engines (C++), studio equipment proficiency, networking & academic writing.

Petroc Community College - Barnstaple, Devon

UAL Level 3 Extended Diploma in Creative Media Production & Technology | 2020 - 2022

Result: **Distinction**
